FOR IMMEDIATE RELEASE

HURRICANE RITA, KATRINA, AND WILMA CLAIMS SETTLED WITH VersaInk™

San Diego, CA--February 9, 2006--G7 Productivity Systems, maker of VersaCheck® software announces the adoption of VersaInknano™ by a major insurance group. The VersaInk™ that has been developed by G7 is magnetic and the first of its kind. Never before has magnetic ink been available for inkjet printers. This new ink allows insurance agents to print checks and high quality business documents on demand. Claims adjusters can even settle claims on the road while using mobile inkjet printers and a laptop connected wirelessly to an enterprise system.

Check printing with VersaInk™ has been particularly effective in the most recent disaster experience associated with hurricanes Katrina, Rita, and Wilma. The insurance industry, and their clients, will be able to benefit quickly from this new ink technology trend.

VersaInk™ with its advanced nano pigment and technology is the only ink of its kind that lets users print unblemished documents, photos, images, and bank accepted MICR checks. The unique magnetic components of the VersaInk™ allow the user to print regulation and federally accepted checks right on the spot! This will be an enormous benefit for the consumer.

VersaInk™ delivers unmatched protection against fading and fraudulent alterations while creating everlasting documents with flawless print quality. VersaInk™ is ideal for use with any business, financial, and desktop publishing application. In addition, VersaCheck® software, in combination with G7's line of security check paper refills,

offers a hassle free solution to printing checks. VersaInk™ is priced comparably as standard ink, but offers critical quality benefits and cost savings in the long run.

Currently, VersaInk™ is available for all popular printer models including Hewlett Packard, Canon, Lexmark, Dell and Epson. Visit www.g7ps.com to see a complete list of supported printer models and cartridges.
