FOR IMMEDIATE RELEASE

G7 Announces New VersaCheck® 2012 with ANY PAPER™ Secure Full Color Check Feature

High-Quality ANY PAPER™ Checks can save users 90% or more vs. pre-printed checks*

San Diego, CA—October 26, 2010 -- G7 Productivity Systems announces the release of its new Windows 7 certified [VersaCheck®](#) 2012 Finance & Check Creation software line, now enabling users to create high-quality full color checks with user-defined custom security features from standard multi-purpose cut-sheet printer paper in addition to traditional blank check paper stock.

VersaCheck® software enables users to manage finances and easily design and print checks that are 100% compliant with ANSI X9 specifications and check processing regulations in the USA as well as rules applicable for Canada and many other countries worldwide. VersaCheck® works alone and seamlessly integrates with QuickBooks, Quicken, Peachtree and others to merge check data from financial software with a large choice of included pre-designed check templates or custom check designs which can be created by users with an included easy-to-use check designer. Creating and printing checks with VersaCheck® saves users 50-90% or more* vs. pre-printed checks purchased via the Internet, mail-order or banks, and ensures compliance with financial industry standards. [VersaCheck® software](#) titles, [VersaInk™](#) magnetic MICR ink (required for the check [bank code line](#)) and [VersaCheck® blank security check paper](#) are available from select retailers and versacheck.com.

VersaCheck's new [ANY PAPER™](#) feature sets a new standard for on-demand full color custom check design and printing. ANY PAPER™ lets users choose and print security check patterns including customizations such as logos, graphics and pictures in full color with their color inkjet printer. VersaCheck® then merges the designs with all

other check data to print a complete check using regular multipurpose paper to save over 90% vs. preprinted checks! This feature also manages printing the endorsement section on the back, without requiring duplex capability.

ANY PAPER™ eliminates waiting times, delivery cost or shopping for special check paper security stock. G7 has added regular multipurpose [check-perforated and non-perforated 24lb blank white paper](#) to the VersaCheck® 2012 line to support the new ANY PAPER™ feature.

Export of accounting data to Excel spreadsheets has been further enhanced to support the reporting needs of banks, accountants and management. All VersaCheck® 2012 business titles now support bank 'Positive Pay' services that protect against account theft. G7 has also included its [4X UltraSaver™](#) ink management software in all VersaCheck® titles, a \$39.99 value, to increase any inkjet printer ink yield by up to 400%.

The VersaCheck® 2012 line includes Presto, Silver, Gold, Platinum, Ultimate, and Enterprise. VersaCheck® 2012 for [QuickBooks®](#), VersaCheck® [Payroll](#) and VersaCheck® 2012 [Accounting & Checks](#) focus on Payroll preparation and the needs of QuickBooks users. All versions of VersaCheck® support quick and easy finance management and work with the latest versions of popular accounting programs like QuickBooks®, Quicken®, Peachtree & others. VersaCheck® [Ultimate](#) integrates with practically any accounting software application and supports up to 20 simultaneous users as a standard feature. The most powerful edition, VersaCheck® [Enterprise](#) can scale to extend check authoring and printing to an UNLIMITED number of users AND locations within one company/organization. Users can work stand-alone to author & print custom checks from their desktop or simultaneously share the same data file throughout a network using any network connected PC. Users can instantly print checks to local or remote network connected locations. Version comparison information is available at versacheck.com/compare.

VersaCheck® software, paper, VersaInk™ and VersaToner™ magnetic ink & toner are available from retail store locations, online resellers and directly from www.VersaCheck.com.

About G7

G7 Productivity Systems, Inc., based in San Diego, CA, is a leading supplier of productivity hardware, software and supplies for both home and business use. G7 offers products in over 4,000 retail outlets in the US, Canada and many other countries world wide following similar check standards based on E13B and CMC7 MICR encoding.
