FOR IMMEDIATE RELEASE

## **Hit the Jackpot with Mobile Check Printing!**

Las Vegas, NV--May 23, 2006--G7 Productivity Systems, maker of VersaCheck software announces Mobile Check Printing Technology. The newly developed VersaInk that works in conjunction with the mobile printer is magnetic and the first of its kind. Never before has magnetic ink been available for inkjet printers. When VersaInk is used with the mobile printer, it allows insurance agents to print checks and high quality business documents on the spot.

Claims adjusters can even settle claims on the road while using a laptop and mobile inkjet printer connected wirelessly to an enterprise system. The insurance industry, and their clients, will be able to benefit quickly from this new ink technology trend. The unique magnetic components of VersaInk allow the user to print regulation and federally accepted checks on demand. This will be an enormous benefit, and relief, for the consumer.

VersaInk delivers unmatched protection against fading and fraudulent alterations while creating everlasting documents with flawless print quality. VersaInk is ideal for use with any business, financial, and desktop publishing application. In conjunction with the Mobile Check Studio and the VersaCheck software, G7 offers a line of security check paper refills that provide a hassle free solution to printing checks.

The server-based technology that is incorporated with the Mobile Check Solution allows the organization to incorporate many different users at one time for maximum scalability. It also incorporates the ability to update check data and format due to merger, logo

redesign or bank change. For more information about the Mobile Check Printing Solution, please visit [www.g7ps.com](http://www.g7ps.com).
