FOR IMMEDIATE RELEASE

G7 Introduces Universal JetFix™ Cleaning Kit for Inkjet Printers

San Diego, CA—March 1, 2007 – JetFix™ from G7 Productivity Solutions restores complete print performance to integrated or non-integrated inkjet printers with clogged printheads. This easy-to-use system deep cleans the nozzles of inkjet printheads, saving time, money, ink cartridges and often, the printer itself. The exclusive, non-toxic and odorless cleaning solution works with any brand of inkjet printer. Each Universal JetFix Cleaning kit includes everything needed for multiple cleanings. The simple 4-step cleaning process clears clogs and with regular use, prevents them. Available at www.g7ps.com, the Universal JetFix Cleaning Kit is priced at \$19.99.

“Print quality is always an important factor whether people are creating documents for personal or business applications,” says Scott Givens, Marketing Director for G7. “As the makers of VersaInknano™, we know letters, photos, bank-compliant checks and more require clarity to make a successful impression.” Many perfectly good printers are thrown out and replaced when print performance declines when all that is needed is a thorough printhead cleaning. Tell tale signs that inkjet printheads are clogged include broken or blurred lines appearing when a test page is run, white lines or missing content (especially in solid areas) on documents and photos. Other indicators include, having to run the “printhead cleaning cycle” more often than twice when trying to print, or when a printer hasn’t been used for a period of time or anytime ink just isn’t being applied to the page.

Scientifically created to work with the unique Magnetic Ink Character Recognition (MICR) properties of VersaInknano™ – JetFix™ easily and safely jumpstarts the printheads of all inkjet printer brands. Results are equally impressive when used to clean cartridges containing the upgraded magnetic-pigment ink featured in the VersaInk™ line or standard inks.
