G7 and OKI Printing Solutions Introduce Affordable High-Volume Check Printing Solution, Streamlining Workflow and Reducing Supplies Costs

San Diego, CA—June 09, 2008 – Leaders in financial productivity solutions, G7 Productivity Solutions (www.g7ps.com) and OKI Data Americas (www.okidata.com), which markets its products under the OKI® Printing Solutions brand, have partnered to release the G7 [B6300nMX](#) complete check printing solution. Available directly from G7, the [B6300nMX](#) network-ready laser printer and software solution allows users to print secure checks on-demand using Magnetic Ink Character Recognition (MICR) laser toner and blank security check paper.

At \$999 for the entire solution, large institutions, departments, branch offices and even small companies can experience dramatic savings by streamlining workflow and reducing check supplies investments by up to 80%.¹ With print speeds up to 35 pages per minute² and duty cycle of up to 150,000 pages per month, the [B6300nMX](#) check printing system offers workgroup features and output volume with unprecedented affordable pricing. The low cost and efficiency capabilities make the [B6300nMX](#) ideal for all black and white laser-printing applications.

“OKI Printing Solutions is excited to support G7 in the high-volume on-demand check printing market. The [B6300nMX](#) printer, software and supplies combination will lead the competition in value and allow G7 to fulfill a critical need of customers - to affordably manage in-house check printing,” said Nick Ciarlante, Sr. Marketing Manager, Mono Products / SIDM / Specialty Products for OKI Data Americas.

The [B6300nMX](#) check printing system is network ready and is delivered with a VersaToner™ cartridge that contains bank compliant MICR check printing toner, VersaCheck® check creation/printing software and CPSA³ approved VersaCheck® Security Check Paper. The complete system generates 100% bank compliant checks that conform to ABA and ANSI X9 check printing specifications. The software works stand-alone or seamlessly integrates with existing financial applications using Intelligent Print Data Interceptor (IPDI) technology. Whether it's AP, payroll, other disbursements or everyday document printing, organizations can dramatically increase productivity with this low cost, easy-to-setup solution.

The [B6300nMX](#) can also be used with FreeQuickWire™ (www.FreeQuickWire.com) Internet check delivery service. Checks can be received via the Internet and printed locally on-demand, eliminating wire transfer and check mailing fees. It can also reduce check information errors and expensive check re-issue cycles. With remote check issuance capability, Internet disbursements of all kinds can result in lower costs and more efficient customer service.

The [B6300nMX](#) is available in June from G7 Productivity Systems (www.g7ps.com).

About G7:

G7 Productivity Systems, Inc., based in San Diego, CA, is a leading publisher and manufacturer of productivity software and supplies for both home and business use. G7's products are available in over 4,000 retail outlets in the US and Canada.
