FOR IMMEDIATE RELEASE

## **VersaCheck® 2010 Helps Business & Home Users Manage Finances, Create Checks and Send Them Low Cost via Email**

San Diego, CA—April 30, 2009 -- G7 Productivity Systems has released its Windows Vista certified [VersaCheck®](#) 2010 Finance & Check Creation software line. Titles include Presto, Gold, Silver, Platinum, Ultimate, and Enterprise. Also certified for Windows Vista is VersaCheck® 2010 for [QuickBooks®](#), VersaCheck® [Payroll](#) and VersaCheck® [Quick Accounting](#). Every VersaCheck® software title is engineered to easily design and print checks that are 100% compliant with ANSI X9 specifications and check processing laws in the USA and Canada. VersaCheck® works stand-alone and can also seamlessly import and merge check data from other popular accounting programs with a large choice of electronic check templates. Printing checks on VersaCheck® blank security check paper saves users up to 80% or more\* vs. pre-printed checks from mail-order or banks, and ensures compliance with financial industry standards. [VersaCheck® software](#) titles, [Versaink™](#) magnetic MICR ink (required for the check [bank code line](#)) and [VersaCheck® blank security check paper](#) are available from select retailers and [versacheck.com](#).

VersaCheck® 2010 is now fully integrated with [ProVision Payment Manager](#) to streamline & expedite check approval and payment workflow. With ProVision, desktop users can send electronic checks via email for recipients to print from their PC. Users can automate funding approval requests from account owners, instantly print email checks from clients who owe them, view & approve checks from any internet connected computer, setup multiple check approvers, and setup vendors to receive & print email check payments. ProVision's fee-based service can be instantly enabled from within VersaCheck® 2010 titles.

All VersaCheck® 2010 titles integrate with [VersaCheck Payment Processing Services](#) for users to accept and process credit card transactions directly from their PC. With this service and an inexpensive USB card reader, users can turn their desktop PC into a complete POS terminal and eliminate the time and cost of setting up expensive credit card terminals. Export of accounting data to Excel spreadsheets has been improved to support the reporting needs of accountants and management. G7 has also included its [4X UltraSaver™](#) ink management software in all its VersaCheck® titles, a \$39.99 value, to increase any inkjet printer ink yield by up to 400%.

All versions of VersaCheck® support quick and easy finance management and work with the latest versions of popular accounting programs like QuickBooks®, Quicken®, Peachtree & others. VersaCheck® [Silver](#), created for home use, generates personal checks; the [Gold](#) version creates checks for personal and business applications. VersaCheck® [Platinum](#) is tailored for business users with additional functionality to create invoices, estimates and business cards. VersaCheck® [Ultimate](#) targets more robust business needs by integrating with almost any accounting title and is licensed for up to 20 simultaneous users. The flagship of the line, VersaCheck® [Enterprise](#) can scale to extend check authoring and printing to an UNLIMITED number of users AND locations within one company/organization. Users can work stand-alone to author & print custom checks from their desktop or simultaneously share the same data file throughout a network using any network connected PC. Users can instantly print checks to local or remote network connected locations. Version comparison information is available at [versacheck.com/compare](http://versacheck.com/compare).
