## **G7 LAUNCHES NEW HP BASED COLOR CHECK PRINTING SYSTEMS**

*New HP inkjet based systems allow users to combine all printing, including color business & personal checks, into one inexpensive device.*

San Diego, CA—December 2, 2009 -- [G7 Productivity Systems \(www.g7ps.com\)](http://www.g7ps.com), maker of VersaCheck® software and VersaInk™ MICR ink cartridges, has released several new [check printing systems](#) based on HP color inkjet printers and All-in-Ones. For as little as \$79.99 users can print documents, marketing brochures, photos and custom, full-color bank compliant checks.

### **Included with each system:**

Each new check enabled system bundle includes an original HP printer/All-In-One, VersaInk-nano black (MICR) and color cartridges, VersaCheck Finance & Check Creation Software and VersaCheck Security Blank Check Paper. VersaCheck software lets users design and print checks directly to blank check paper. VersaCheck also enables printing directly from existing accounting programs like QuickBooks®, Quicken®, Peachtree and others.

### **Pricing & Availability:**

[HP Deskjet D1660-MX Bundle](#) –

Single function color check enabled systems starting at \$79.99

[HP Officejet J4580-MX Bundle](#) -

All-in-One color check enabled systems starting at \$169.99

[HP DeskJet 6988dt-MX Bundle](#) –

Network ready color check enabled systems starting at \$249.99

G7's ongoing mission is to decrease worldwide printing costs and environmental waste while enhancing print productivity and quality. Pre-enabled original HP inkjets with full color check printing capability is the latest release within a family of highly innovative printing solutions being delivered by G7 to control costs and enhance quality.

### **VersaInk-nano:**

Printing to blank check paper using a desktop inkjet printer is possible because of G7's revolutionary VersaInk-nano cartridges. Each cartridge is filled with VersaInk-nano Magnetic Ink Character Recognition (MICR) ink for readability in bank and retail check scanners. In addition to creating superb output quality for photos and text, VersaInk-nano is the only ink for inkjets that complies with legislation and bank regulations for MICR check printing per ANSI X9 standards.

Until VersaInk-nano was developed, PC based check printing was limited to expensive black and white laser printers equipped with high-priced MICR toner cartridges. G7 redefines printing for small business and home users by pre-enabling original HP inkjets with full color check printing capability while saving users on every check they print – often hundreds if not thousands of dollars per year.

All systems are available now at [www.g7ps.com/printers](http://www.g7ps.com/printers).

### **About G7**
