VersaCheck Platinum 2007 earned the top spot for having the most check design features, the ease of use of the program, the available features for home and small business bookkeeping, the ease of the installation, and the help and support available for the product.

VersaCheck Platinum 2007 allows the user to choose from over 50 check design templates, or to develop templates from scratch. This software also provides helpful bookkeeping and accounting features for the home and small business. VersaCheck Platinum 2007 maintains up to 5 simultaneous users and can quickly track and manage customer payments. This program also allows the user to create and manage estimates, invoices, and statements.

In order to efficiently and effortlessly print bank compliant checks with the VersaCheck Platinum 2007 software, magnetic ink must be used in order to fulfill government and bank regulations. G7 has developed VersaInk MICR ink that works flawlessly with the software.

VersaInk contains magnetic nano-pigments, for 100% bank and government compliance. VersaInk print cartridges also deliver unmatched protection against fading and fraudulent alterations while creating everlasting documents with superior print quality.

Recently introduced 4X VersaInk-nano superyield sets new standards for print quality and simultaneously extends your cartridge yield up to 4 times. This technology is integrated into G7 VersaJette inkjet printers and available separately as upgrades for existing printers.

Currently, VersaInk-nano superyield is available at G7 Productivity Systems, and many nationwide retailers. Also, visit www.g7ps.com to see a complete list of software, supported printer models and ink cartridges. For more information on VersaCheck Platinum, please visit www.g7ps.com/vcp.
